

# COATING REMOVAL

The **Diamabrush™** Coating Removal tool is the fastest, most effective tool for the removal of mastic, adhesives, thin-set and thin mil epoxies. The patented design of the **Diamabrush™** Coating Removal tool prevents the abrasive from loading up or clogging like other abrasive products resulting in fast, consistent removal throughout the life of the tool. Not only will you save significant time and money using the **Diamabrush™** Removal tool, but you can do so without the investment or hassle of expensive, hard-to-use equipment like diamond grinders or shot blasters – that often require 480 3-phase power or special training for use. The **Diamabrush™** Coating Removal tool makes the toughest removal jobs seem easy.

- **SIMPLICITY** – use on existing, standard equipment such as automatic scrubbers and flooring machines
- **FAST** – the **Diamabrush™** Coating Removal tool will not load up or clog resulting in fast-effective removal throughout the life of the tool
- **SUSTAINABLE** – the **Diamabrush™** system is a mechanical removal solution that is chemical-free
- **COST EFFECTIVE** – removes coating and profiles the concrete surface in one easy step - at a fraction of the cost of traditional coating removal methods

# COATING REMOVAL

The **Diamabrush™** Coating Removal tools are simple to use. To get started, end-users will need to provide the following to determine what brushes are required for their project:

- 1) Make and model of machine
- 2) Size (diameter in inches) of brushes
- 3) Overall square footage to be restored

Once the required brushes are determined, you are ready to begin the coating removal process! Please contact a **Diamabrush™** representative at our customer service line at: **1 (855) DB-TOOLS** with any questions or concerns.

*Works On Standard Rotary Machines*
