

HARDWOOD TOOL

Refurbishing a hardwood floor is easy with the **Diamabrush™** Hardwood Prep Tool. The tool is designed to remove polyurethanes, aluminum oxide, carpet adhesives and other hard to remove coatings from hardwood floors. The **Diamabrush™** Hardwood Prep Tool is the first step in the refurbishing process effectively removing a coating from the floor. The diamond cutting surface of the Hardwood Prep Tool easily removes the mess that caramelized sandpaper can create. The diamond cutting surface remains free of melted or gummed up coatings and maintains sharp points throughout the life of the tool saving do-it-yourselfers and contractors time and money.

- **SIMPLICITY** – use on existing, standard flooring machines
- **FAST** – the Diamabrush Hardwood Tool will not load up or clog resulting in fast-effective removal throughout the life of the tool
- **SUSTAINABLE** – the Diamabrush system is a mechanical removal solution that is chemical-free
- **COST EFFECTIVE** – removes coatings quickly saving labor and sandpaper

HARDWOOD TOOL

The **Diamabrush™** Hardwood Tool removes glue, adhesives, and tough coatings from hardwood floors. The **Diamabrush™** Hardwood Tool is simple to use. To get started, end-users will need to provide the following to determine what brush is required for their project.

1. What is the Make, Model, and Size of the machine being used?

Works On Standard Rotary Machines

Once the required brushes are determined, you are ready to begin transforming your floor! Please contact a **Diamabrush™** representative at our customer service line at: **1 (855) DB-TOOLS** with any questions or concerns.
